NorthPeak Logistics Inc.

Quarterly Shareholder Report — Second Quarter, Fiscal Year 2026 (April–June 2026)

Financial Highlights

Revenue for the quarter was $426 million, an increase of 3.4% over the previous quarter, at the upper end of guidance. Net income was $35 million, representing a net margin of 8.2%.

The board approved a quarterly dividend of $0.18 per share, a 12% increase, payable in August.

Revenue Performance

Growth this quarter was driven primarily by the same-day delivery pilot, which exceeded internal targets in all three launch cities and will expand to five additional markets next quarter.

Cross-border freight grew a further 4.1%, while contract logistics stabilized after last quarter's client transitions.

Margins and Costs

Gross margin recovered by 60 basis points as the fleet maintenance program concluded ahead of schedule and fuel surcharge mechanisms caught up with diesel prices. Labor costs rose 2.3% following the new driver compensation agreement.

Outlook

For the next quarter, management is guiding to revenue growth of 2% to 3%, with the same-day expansion partially offset by expected softness in industrial freight volumes.

Principal Risks

The most significant risk this quarter is execution risk on the same-day delivery expansion, which requires hiring approximately 400 drivers across five markets in under ninety days.
